

DIREXYON

Quality assurance developer student (16 hours/week)

DIREXYON Technologies is an international software development company specializing in the creation of innovative platforms for complex modeling. Established in 2001, the company brings together passionate professionals from the fields of artificial intelligence, finance, engineering and mathematics, for whom excellence and innovation are part of their daily lives.

As a full member of our development team, you will be able to test your skills by validating our DIREXYON application. The DIREXYON modeling platform was created by financial experts, engineers, marketing specialists, as well as experts in computer science and artificial intelligence. Together, they have democratized complex financial modeling that allows decision-makers to measure all possible outcomes, while taking into account unpredictable factors (e.g., environmental, economic, social) in order to find the most profitable investment options for their company or organization.

DIREXYON is a Rich Internet Application in order to provide an interactive and visual user experience. You will have the opportunity to use the latest technologies available on the market such as Angular, .Net Core, PostgreSQL, AWS and Docker.

Responsibilities

We are looking for a **quality assurance developer student (16 hours/week)** whose ideas and initiatives will make a difference on a daily basis.

Within the development team, the analyst is responsible for:

- Design, execute and maintain the automated test library
