

## Senior Conceptualization and Modeling Specialist

DIREXYON technologies is an international company specialized in the creation of innovative platforms for complex modeling. Established since 2001, the company brings together passionate professionals from the fields of artificial intelligence, finance, engineering and mathematics, for whom excellence and innovation are part of their daily lives.

Created by financial experts, engineers, marketing specialists, as well as computer and artificial intelligence experts, the DIREXYON platform democratizes access to complex financial modeling. It allows to find the most physically and financially profitable options for the management of assets, infrastructures and customers (marketing and loyalty) of companies in the short, medium and long term.

Our clients include Hydro-Québec, Energir, Investissement Québec, Air Canada (Aeroplan), La Caisse de Dépôt et Placement du Québec, the City of Montréal and many others. We also work in partnership with reputable firms such as Accenture, PMP and many others.

DIREXYON Technologies is expanding internationally and is looking for a **Senior Conceptualization and Modeling Specialist** for its office located in downtown Montreal. Are you looking for a work environment in constant evolution, stimulating responsibilities and challenges? Are you passionate, enthusiastic and determined? Don't wait any longer, apply at DIREXYON!

### Responsibilities:

Our small team is agile and works in a spirit of openness, knowledge sharing and collaboration. All members are heard and there is room for leadership for each of them. DIREXYON offers a great opportunity to explore new technologies and work on diversified mandates. In short, you will have the opportunity to manage platform implementation projects for clients:

- Manage budgets, deliverables and deadlines
- Analyze business needs with the client and define modeling requirements
- Designing and developing decision-making models with the client
- Participate in the consolidation and processing of customer data
- Contribute to the design of results reports and dashboards
- Deliver presentations and demonstrations to clients, including senior management
- Training users at clients and partners' sites
- Provide technical support to users and partners
- Collaborate with the sales team
- Participate in the definition of software development requirements
- Test new application functionalities
