

DIREXYON

Specialist in Financial Modeling - MODEX platform

DIREXYON Technologies is in full expansion and is looking for a Financial Conceptualization and Modeling Specialist to work in its MODEX division located in their downtown Montreal offices.

DIREXYON technologies is an international company specializing in the creation of innovative platforms for complex modeling. Established since 2001, the company brings **together passionate professionals** from the fields of **artificial intelligence, finance, engineering, IT and mathematics**, for whom excellence and innovation are part of their daily lives.

To date, DIREXYON has designed two decision support platforms, the DIREXYON and MODEX platforms. The MODEX platform simplifies and accelerates clients' business processes such as budget planning, strategic plan development, financial framework development, contract awarding and financial statement production, among others.

Are you looking for a constantly evolving work environment, stimulating responsibilities and challenges? Are you **passionate, enthusiastic** and **determined**? Don't wait any longer, apply at DIREXYON!

Responsibilities:

Our small team is agile and works in a spirit of openness, knowledge sharing and collaboration. All members are heard and there is room for leadership for each of them. DIREXYON offers a great opportunity to explore new technologies and to work on diversified mandates.

You will have the opportunity to help our clients conceptualize their business models on the MODEX platform:

- Analyze business needs with the client and define modeling requirements
- Propose new modeling approaches based on your expertise
- Design and develop business models on the platform
- Participate in the definition of software development needs
- Collaborate with technical stakeholders at the client's site
- Training users on the platform at customer sites
- Test the new application functionalities
- Provide technical support to the platform users

What we're looking for:

- Excellent analytical and problem-solving skills
- Experience in business needs analysis
- Interest and skills in financial modeling
- University studies in Information Technology, Finance, Engineering or equivalent
- In-depth knowledge of Microsoft Excel
- Interest and skills in programming and data processing
- Possesses 3 to 5 years of relevant experience
- Bilingualism (French and English)
- Experience in ETL development, databases and SQL (asset)
- Consulting experience (asset)

DIREXYON

What we offer:

- Recent offices, with a collaborative area, near the 2 metro lines in downtown Montreal and the train station.
- A competitive salary
- A flexible schedule
- A relaxed atmosphere
- A group insurance program
- Paid holidays during the holiday season, in addition to regular vacations
- 5@7 and corporate activities
- All-you-can-eat snacks, drinks, tea and coffee
- Reimbursement of the costs of sporting activities
- Reimbursement of tuition or vocational training fees
- Pairing program for the integration of new employees

Want to join our team today? Send your resume and cover letter to talent@direxyon.com.

We thank all interested candidates; however, please note that only those selected will be contacted.

We look forward to hearing from you!
